SUPPLEMENT TO  
REPORT NO.

25X1

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U. S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1

1. Employees of the VEB Serum-Werk, Dessau, know of the plan 1/ to separate the Rottenau Serum Station from the control of the Dessau plant and to place the Rottenau Station under the administrative control of the Animal Disease Research Institute, Riems Island. However, the actual separation has not yet taken place.
2. Recently, all department heads of the VEB Serum-Werk, Dessau, went to Dessau-Luisium to determine, on the site, whether the production of erysipelas serum from pigs could be carried out in the small quarters of the Luisium Station. It was agreed that such production was possible there.
3. It is anticipated that the Rottenau Station will no longer produce erysipelas serum after it has been taken over by Riems Island. There is no justification for further large-scale production of swine erysipelas vaccine because future requirements will be lowered considerably after vaccination with erysipelas adsorbed vaccine. Further, the Tornau Station of the VEB Serum-Werk, Dessau, also produces erysipelas serum from horses.
4. Prof. Roehrer of Riems Island is allegedly trying to effect the transfer of even larger segments of the serum and vaccine production of VEB Serum-Werk, Dessau, to his control.
